

Mileva 33F

Accurate and reliable continuous monitoring for methane leaks

Mileva 33F is the latest solution for cooled continuous monitoring of hydrocarbon (HxCx) gas leaks. The spectrally optimized cooled 640 x 512 pixel detector combined with RedLook's established AI neural networks improve the Minimum Detectable Leak Rate, detection probability, provide surveillance and perform intelligent thermography.

REDLOOK

Mileva 33F is a part of our AI-powered RedLook solution for exhaustive continuous monitoring and real-time alerting. RedLook is highly versatile, allowing operators to configure several Regions of Interest (RoI) within the area to be autonomously monitored. RedLook can assign a functionality to each configured RoI, granting a complete and safe surveillance of the installation.
